

MUCHEA VEAL REPORT 4th July 2022

Today agents yarded a total of 320 veal with Nutrien livestock selling 267 of them. This week's yarding was predominately pastoral bred calves. Butchers and graziers were active on certain lines this week although the general trend was for the prices to ease by up to \$80-\$120/h. Buyers were more selective on type and eastern states buyers lessened their demand across all categories. Brahman bull calves sold to a top of \$700 whilst the heifer portion sold up to \$600 also.
