

MUCHEA VEAL REPORT 10th October 2022

Today agents yarded a total of 70 veal with Nutrien livestock selling 44 of them.

The total yarding was well back today on previous weeks which didn't have any effect on price. Good local calves along with the usual run of pastoral bred cattle presented. Heavy local calves met with very strong local butchers demand with the pastoral bulls meeting with strong demand from graziers.
