

## **MUCHEA VEAL REPORT 12<sup>th</sup> December 2022**

Today agents yarded a total of 171 veal with Nutrien livestock selling 106 of them.

This week calf sale total yarding was reduced on totally number and lacked the quality of previous weeks. Both local and pastoral calves presented again and the demand was equal only on the better bred calves. Any cattle that were in store condition lacked competition. Graziers continued to pick their way through the yarding whilst butchers stood back.
