

MUCHEA VEAL REPORT 04th SEPTEMBER 2023

Today agents yarded a total of 68 veal with Nutrien livestock selling 49 of them. With this week's yarding being of mostly pastoral origin the quality was less than the week before. The calves were very storey and lacked condition. The local calves that were penned lacked local grazer competition. Buyers were very selective on type and quality, therefore reducing demand significantly this week.
